In a hurry? Find brief answers to your most commonly asked Website Content editing questions.

How do I restore a previous version of a page?

I get a message saying I have an old draft - what's this?

Is it possible to delete page assets? The link has been removed from the page but it is still appearing in Google search results.

I've added a 'required' question on my form page but it doesn't look like it's working. How can I sort this?

How do I stop Google Search from pulling through out of date page information?

I've added a mailing list widget to a form page and every time someone ticks the mailing list box and clicks 'Update', the form on the same page submits a response. Is there a way around this?
